

## **GREAT ACCESSIBILITY FEATURES**

All GREAT buses are low floor with a kneeling feature, which makes it accessible for almost anyone. In addition, all the buses are equipped with fold out wheelchair ramps, with designated areas for two wheelchairs on each bus. A voice announcement system that announces major stops along the routes is also a benefit for passengers. Signage on the buses is in both English and Spanish along with universal signage. Buses are clearly marked as to the Route they serve. Seats in the front of each bus are reserved for the elderly and disabled when needed. Most bus shelters and bus stops are accessible. However, if there is a concern about a particular stop, GREAT will work to improve a stop or develop a new stop for the benefit of passengers.
